

FO-2 FIBER ORGANIZER

The AOFR Fiber Organizer Package type FO-2 provides storage for couplers, splices and excess fiber without violating minimum fiber bend radius specifications. Eight breakouts are located on each end for cable ingress/egress. The cover breakouts align with the cable ingress/egress channels on the base structure. Tabs, located around the periphery of the base structure, help retain stored fiber. All mounting or accessory holes are sealed and the cover/base assembly can be sealed to prevent moisture or contaminants from entering. The FO-2 is designed to fit a wide range of existing closures and splice tray hardware with a range of mounting options.

FEATURES

- Meets fiber bend radius specifications
- Entry/exit breakouts for buffer or cable
- UL 94V-0 flame rating
- Operating temperature -40°C to 85°C

APPLICATIONS

- Protected storage for fiber, couplers, splices
- Fiber breakouts
- Fiber networks
