

### PASSIVE 1x4, 1x8, 1x16, 1x32 and 1x64 PLANAR SPLITTERS

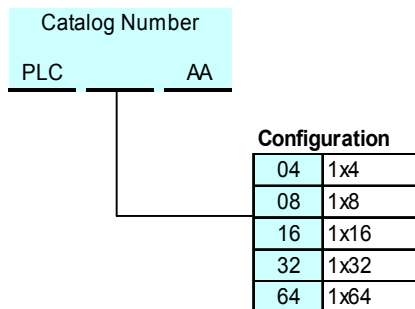

AOFR's Planar splitters specifically designed for FTTX Passive Optical Networks (PON) applications and comply to Telcordia GR-1209-CORE and GR-1221-CORE specifications. These ultra wide band devices have low insertion loss, tight uniformity and low PDL over the entire 1260nm to 1600nm wavelength range. Their small size is ideally suited for outside plant splice enclosures in PON applications where single point, large port count splitting is desired.
